Increased Noise Alert

Dear CMF Community Members:

As part of Metrolink's promise of greater operational transparency with the CMF community, Metrolink has committed to informing community members whenever there is activity that is out of the ordinary including sand deliveries, construction at the site or any other activity that impacts our neighbors.

From Friday, September 4, 2020 until Monday, September 7, 2020 the city of Los Angeles is on excessive heat watch. We wanted to inform you that it is likely that you will hear increased noise from the Tier 4 locomotives due to the locomotive cooling fans.

Over the last few weeks our Tier 4 locomotives, the newest addition to our fleet, have caused an increase in engine noise due to the impact hot weather has on blowers. We implemented one fix last year to reduce the noise, we are committed to making more improvements. Our team is working on a new modification that we hope to have in place in the

near future. To read more about our noise reduction efforts, please read our [noise reduction letter](#) that was sent out earlier this week. While we recognize that the noise can be disturbing, we continue to believe that the substantial reduction in emissions that Tier 4 locomotives provide is an important benefit.
